Professional Profile

*Interactive Design **student** with an interest in **video game development, interactive storytelling and digital experience design.** I have experience in **Unity (2D, 3D and VR)** developing interaction systems, level design and interactive prototypes, as well as in **3D animation in Maya** for characters and cinematics. I have participated in academic projects of video games, virtual reality experiences and gamification, working both in **technical implementation and in user experience (UX) research** through qualitative and quantitative methodologies. I handle design, prototyping and digital production tools, including **Unity, Maya, Figma and audiovisual tools.***

*I am characterized by my **narrative thinking, creativity applied to interactive design, problem solving, and ability to work in multidisciplinary teams under pressure.** Look for an internship where you can contribute to the development of **video games, interactive experiences or user-centered digital products.***

Formal education

EAFIT University
Bachelor's Degree in Interactive Design. AP: 4.3/5.0
2022 – ongoing

Competencies

- Teamwork.
- Critical thinking.
- Creativity applied to interactive narrative.
- Problem solving.
- Adaptability.
- I work under pressure.

Knowledge, systems and languages

Game Development
Unity (2D, 3D, VR)
Level Design
Interaction Systems
Interactive prototyping

3D and Animation
Autodesk Maya (modeling and intermediate animation)

Design and UX
Figma
Canva
Genially
UX Research (Qualitative and Quantitative)

Audiovisual Production
CapCut
InShot
After Effects (Basic)

Audio
Reaper
Audacity

Languages
English — Native
English — B2 certificate **(Track Test, 2024)** / Conversational level C1**.**

Experience (applied academic projects)

- **Labyrinth Escape (2026)**
  3D game developed in Unity
  • Design and development of the **level design** of the game.
  • Implementation of **player interactions with objects and obstacles** in the environment.
  • Development of **game menu and tutorial system**.
  • Compilation and publication of the project in **WebGL.**

- **Inkomprendido (2025)** – Project with IndieLevel
  3D turn-based combat video game with cards
  • Development of **character animations** (attack, healing, damage, idle).
  • Production of the **main cinematic of the game** from the narrative script.
  • Deploying and rendering animations in **Autodesk Maya**.

- **Well-Start (2025)** – Project with FunFactor
  Virtual **reality gamification experience** for active work breaks
  • Qualitative and quantitative UX **research** with organizational well-being managers.
  • Design **of user interfaces (UIs)** for the experience.
  • Recording and implementation of **voice-over** within the experience.

- **Mount Sereno Beyond (2025)**
  Virtual reality experience **in Unity for Meta Quest 3** • Design and implementation of an interactive area of the environment.
  • Development of **user interactions with the virtual space**.
  • Optimization of the environment to generate an **immersive experience**.

- **Maleficum (2024)**
  Narrative 3D animation
  • Production of the **final 12 seconds of the animation**.
  • Advanced use of **Graph Editor, parenting and rendering in Maya**.
  • Development of character **animation fundamentals**.

- **Audiovisual Productions (2024)**
  Three academic short films
  • Participation in the **art and setting team**.
  • Management of **locations, props and transformation of scenic spaces**.
  • Support in **makeup, decoration and visual design of the set**.

- **Urbam City (2023)**
  Interactive educational app in Unity
  • Development of the **touch interaction system for mobile devices**.
  • Programming of **the player's movement and interaction with objects in the environment**.
